## ABOUT ME

As a driven university student who is passionate about growth and development, I have been to variety of large and small projects during my studies. I do well in fast-paced environments, learn new information quickly, and enjoy tackling new challenges. I look forward to working on meaningful projects and making a positive contribution with my willingness to learn and adapt.

---

## EDUCATION

### Software Engineering - Istanbul Aydin University

Jan 2021 - Present

Knowledge that I have gathered in this step of my education:

- Management and process oriented lectures
- Grasping importance of documentation and how to write them
- Genereal software development lifecycles and processes
- Problem solving and coding skills

### Computer Engineering (Double Major) - Istanbul Aydin University

Mar 2024 - Present

Skills that I developed in Computer Engineering major:

- Software architectures and principles to use
- Analytical thinking and changing approaches to diffrent problems
- Software develoment and data structures
- General knowledge about computers and electronics

### Computer Science (Erasmus+) - Silesian University in Katowitce

Sep 2024 - Feb 2025

In this one semester period I have acquired in these skills:

- Data visualisation in business analytics
- AI, ML, decision and assosiacion technologies with various python libraries (TensorFlow, Scikit-learn and so on)
- Theoritical concepts and ethics of AI systems

---

## POSITIONS - PROJECTS

### Fullstack Developer at Desibona

May 2025- September 2025

Al have practiced both frontend and backend technologies at this position. I have practiced:

- Full stack development and integration with React, Next.js, ASP.Net Core.
- CI/CD pipelines, effective github usage, Azure cloud capabilities and security measures, Vercel hosting capabilites and optimisation.

### Cancer Researcher Internship at Istanbul University

August 2025 - September 2025

I have developed and am developing ML models for cancer recognition for Istanbul University and gathering them in a interactive hub. I have practiced in:

- Fullstack and ML/AI development with React, Next.js, Django, ASP.Net Core; Tensorflow.
- Project is still ongoing with the university and will be expanded with Radiology faculty's additional help and provided data.

---

## SKILLS AND COMPETENCIES

- **Soft Skills:** Project Coordination & Team Leadership, Technical Documentation & Report Writing, Agile Methodologies (Scrum & Kanban), Adaptability & Quick Learning
- **Languages:** Turkish(Native), English(C1), Polish(A1)
- **Programming Languages:** C#, Java, JavaScript(ES6), React, Python, R(Shiny), Html & CSS, Bootstrap, TailwindCSS
- **Technologies:** Azure Cloud Technologies, React, TypeScript, Django, GitHub, CI/CD Pipelines, ASP.NET Core, Express.js, Tensorflow, RSES2, Resnet, Next.js, Vite.js, React Native, Git Version Control, Linters

# MY PROJECTS

You can see the summary of some of the projects I developed solo or with a team.

---

## MIJNBUTIK VE MIJNKITABEVI

[WWW.MIJNBUTIK.COM](http://WWW.MIJNBUTIK.COM)

Gained full-stack development and cloud deployment experience by building a comprehensive and high-performance e-commerce site.

- Azure: Built and deployed a scalable infrastructure
- MSSQL: Designed complex tables and optimized queries
- ASP.NET Core: Developed secure and high-performance RESTful APIs
- Next.js: Created a modern, component-based frontend

---

## IU-ML PROJECT

Github Repsu: [ShiningDespair/BrainCancerClassification](#)

Worked on frontend, backend, and AI models in a microservices-based medical imaging project, achieving 95%+ accuracy.

- Next.js: Developed a component-based modern frontend, using Clerk for authentication
- ASP.NET Core & Django: Implemented business logic and model services
- MSSQL: Designed and managed the database
- TensorFlow, XGBoost, Random Forest: Built CNN models (ResNet50, BaseLineCNN, etc.) for brain cancer, MS, lung cancer, and Alzheimer diagnosis

---

## SHINY - BUSINESS ANALYSIS

Github Repsu: [ShiningDespair/ShinyApp](#)

R, Shiny: Integrated forecasting and clustering models into a modern, interactive interface to provide meaningful business insights.

- R & Shiny: Developed advanced analysis panels and interactive visualizations
- Forecasting & Clustering: Produced data-driven decision support outputs
- Business Analytics: Generated meaningful and visualized insights for business decision-making

---

## DHS YAZILIM

[WWW.DHSYAZILIM.COM](http://WWW.DHSYAZILIM.COM)

Developed a modern, responsive, and user-friendly website for a SaaS-focused organization.

- TailwindCSS & SweetAlert: Designed a modern and interactive UI
- Vercel: Gained hands-on experience with CI/CD, fast deployments, and performance optimization
- UX Features: Implemented light/dark theme support and user experience-focused enhancements

---

## UNISKOR

Github Repsu: [ShiningDespair/UniScore](#)

Developed a modern forum site using MVC architecture, where students could only comment on their own universities.

- Frontend: Built a component-based modern UI with Create React App
- Backend: Developed APIs with Express.js and designed the MySQL database
- Authentication: Implemented a secure user system using university email structure scraped from YÖK

---

## SOUNDCHART

Github Repsu: [ShiningDespair/sound-chart-backend](#)  
&& [OlcaYagdir/sound-chart](#)

Developed a modern and interactive web application visualizing music usage statistics.

- ASP.NET Core MVC & MSSQL: Designed backend and database
- Vite.js: Built a fast and responsive frontend
- D3.js: Created meaningful and interactive data visualizations
